What is a 12 volt uninterruptible power supply?

12 Volt 12A Uninterruptible power supplies includes a 5AH battery for 12V buses, cars and other vehicles to give a robust battery back-up for equipment in emergency vehicles. (BBU) 12 volt DC UPS module or battery backup (BBU) keeps 12 volt equipment alive in cars, buses, trucks and taxis using an internal sealed lead acid battery.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What kind of battery does a DC UPS use?

Our DC UPS systems for 12?V /24?V /48?V provide an uninterruptible power supply and ensure fail-safe availability of process-critical systems and components. Maintenance-free supercaps, long-life and safe LiFePO4 and lithium-ion battery packs, or classic lead-acid batteries are used.
