
300wh power station in China in Sudan

Will China build a solar power station in Sudan?

July 2,2025 (PORT SUDAN) - China's Huawei has proposed building solar power stations in Sudan with a capacity of over 1,000 megawatts (MW), the country's energy ministry announced on Wednesday, as the conflict-hit nation struggles with extensive damage to its power grid.

Will Huawei build new solar power stations in Sudan?

"The Huawei delegation revealed the company's intention to implement a huge project to build new solar power stations... to enhance Sudan's renewable energy sources," the statement said. Sudan's power infrastructure has been severely damaged during the ongoing conflict.

How much of Sudan's electricity is derived from hydropower?

While 54.6% of the country's electricity is derived from hydropower, other renewable sources collectively contribute a mere 0.78% to the national grid. To address this disparity, collaborative efforts between public and private sectors are imperative to advance renewable energy development and utilization in Sudan.

What is the energy supply in Sudan?

The energy supply in Sudan is primarily derived from crude oil, hydroelectricity, biomass, and renewable energy sources such as wind, solar, and geothermal energy. As illustrated in Figure 2a, biomass is the largest contributor, accounting for 52% of Sudan's total energy consumption.
