What does a 24V battery inverter do?

A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup / emergency power source in case of power cuts.

Can I use a battery to power the inverter?

The output need to be connected to the grid power. Can not supply power directly to the AC loads. Please note if using 12v battery as input source, output power will not be 100% if voltage less than 15V. We will suggest using 24v battery as input source to get a better output power. Use a battery to power the inverter, please use a circuit breaker.
