
Aarhus Denmark Energy Storage Equipment Processing

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

What is the advanced energy storage Conference?

Stay updated on the conference and other relevant news and events within the field of energy, refrigeration and heat pumps, by subscribing to the Refrigeration and Heat Pump Technology newsletter. The Advanced Energy Storage Conference is an annual event focusing on electrical and thermal energy storage.
