## Accra lithium energy storage power production plant

Why should Ghana invest in ewoyaa Lithium Project?

The Ewoyaa lithium project could position Ghana as a strategic supplier of lithium in the global market and help diversify its economy away from traditional commodities such as gold, cocoa, and oil. The project could also pave the way for further exploration and development of other lithium deposits in Ghana and the region.

When will Ghana's first lithium mine start?

Picture: Supplied. Atlantic Lithium Limited sets sights on late 2024 for the commencement of construction and early 2025 for initial production at the Ewoyaa Lithium Project in Ghana, marking significant progress in establishing Ghana's first lithium mine.

Will ewoyaa be the first lithium mine in West Africa?

The Ewoyaa lithium project in Ghana is expected to start production in 2025 and become the first lithium mine in West Africa. The project could transform Ghana's economy and boost its green transition.

Where is the ewoyaa Lithium Project located?

The Ewoyaa lithium project, developed by Atlantic Lithium, is expected to start production in 2025 and reach its full capacity of 365,000 tonnes of lithium annually in 2026. The project is located in the central region of Ghana, about 100km southwest of the capital Accra.
