
Airports use Asia-Pacific folding containers for exchange

Should a port use foldable containers?

Using primary and secondary data sources the pros and cons of using foldable containers as compared to standard containers are identified, and it is shown that a port can gain cost efficiencies by using foldable containers.

Can foldable containers improve logistics management?

Capacity Improving Logistics Management Using Foldable/Collapsible Containers: A Case Study G 179 G constraints in ports for storing and repositioning empty standard containers are major concerns in the logistics and port industry. As an alternative, foldable containers have been introduced into the market.

How foldable containers affect the cost of shipping?

Furthermore the use of foldable containers can have significant impact on the cost of shipping. Shipping companies can save the additional costs of handling and carrying empty containers when they call at a port and the additional capacity in the ship can be used for extra cargo.

What is a fallpac foldable container?

The Fallpac foldable container is a type of foldable container in which four same-type foldable containers can be stacked on top of one another inside an already assembled Fallpac container (Konings and Thijs, 2001).

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing upright in bundles, safely and quickly.

Green Corridors 4FOLD is actively looking at launching Green Corridors over the world together with carriers and shippers to be able to make the best use of the benefits of the ...

This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable containers with more advanced designs. A ...

The Asia Pacific region is witnessing robust growth in the air cargo containers and pallets market primarily due to the rapid expansion of its e-commerce and manufacturing sectors.

The Asia Pacific Shipping Containers Market size is valued at USD 3 billion, driven by market trends, segmentation analysis, and player insights. Explore the market share, revenue, and ...

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and ...

Abstract This paper analyzes the effect of foldable containers in various circumstances. Recently, as a result of the COVID-19 pan-demic, many unexpected situations ...

Abstract: This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable containers with more advanced ...

Foldable containers have the potential to enhance the cost efficiency of the logistics industry and improve the problem of space allocation at seaports. Using primary and ...

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and installing facilities that accommodate ...

This paper analyzes the effect of foldable containers in various circumstances. Recently, as a result of the COVID-19 pandemic, many unexpected situations have arisen in ...
