
Battery cabinet dropped at Pretoria Telecom site

Can cell tower batteries be stolen?

In recent years, telecom base stations and sites all over the world have been suffering from battery theft. Even when the issue is localized to a single site or tower, finding out and potentially replacing these cell tower batteries gets expensive quickly.

Does Galooli have a cell tower monitoring solution?

Fortunately, Galooli has a cell tower monitoring solution to address these challenges and avoid traditional pitfalls from standard ineffective deterrents. Galooli's Battery GPS Tracker technology offers a smart and easy-to-use solution that can be integrated with the most common batteries used in the market.

What is a cell tower battery management solution?

The solution includes live displays for cell tower battery status, charging voltage, temperature, functionality, as well as any inconsistencies or outstanding issues. This also includes a remote battery management tool accessible on desktop, web, and mobile to control an under-performing module before it becomes permanently damaged.

Why are batteries being stolen?

The original assumption was that batteries were being stolen for recycling lead contents or for self-use. As it turns out, the majority of the stolen devices are smuggled outside the borders, and some are even sold in the local black market.
