
Buy batteries first or inverter first

Should I buy an inverter battery?

If you answered yes, it is essential that you evaluate certain criteria before buying in one. Because each family has a unique power need, you must choose your inverter battery appropriately. The battery is the core of every backup power system.

How do I Choose an inverter battery?

It's a good idea to choose an inverter battery that is slightly larger than your needs. This will give you some room to grow and will ensure that you have enough power for your devices. When choosing an inverter battery, it's also important to consider the type of waveform that you need.

Why is a battery important in an inverter?

The battery is very important in the life of an inverter. The inverter turns grid-supplied energy into direct current, and the battery stores this direct power. When there is a power outage, the inverter pulls electricity from a battery and converts it to alternating current to power all home loads.

Do Inverter Batteries need to be replaced?

Because each family has a unique power need, you must choose your inverter battery appropriately. The battery is the core of every backup power system. Depending on its usage, performance, maintenance, and upkeep, an inverter's battery may need to be replaced twice or more over its lifespan.
