
Cape Town solar container communication station Battery Installation Regulations

Are solar panels legal in Cape Town?

National regulations apply across the country, but a city like Cape Town might have equipment guidelines for solar installations. For example, Cape Town requires residents and businesses to register their grid-tied solar PV systems.

Can I use a standby solar PV system in Cape Town?

No. Off-grid and standby solar PV systems are no longer permitted on properties with City of Cape Town electrical connections. Many solar PV systems using non-approved inverters are not correctly wired, posing risks to the safety and integrity of the network and significantly slowing down the registration process.

Do you need a certificate of compliance for solar panels in Cape Town?

For example, Cape Town requires residents and businesses to register their grid-tied solar PV systems. This registration process is vital to guarantee that any solar power fed back into the grid doesn't disrupt the local electricity supply. Cape Town also requires a Certificate of Compliance (COC) for solar installations.

What are the requirements for small-scale embedded generation systems in Cape Town?

City of Cape Town small-scale embedded generation requirements: As of October 2023, residents and businesses seeking to install small-scale embedded generation systems must comply with specific requirements, including initiating a prior approval application, registration of inverters, and submission of compliance certificates.
