
China circuit breaker outdoor in Cebu

What is a circuit breaker?

Circuit breakers are switching devices that can close, carry and break the current under normal circuit conditions and can close and carry and break the current under abnormal circuit conditions within the specified time. WHO ARE WE?

How do circuit breakers work?

Circuit breakers cut off electricity during overloads or short circuits to prevent damage. Electrical boxes enclose and protect these components, while fuses melt to break the circuit in case of overloads. These components ensure safety and reliability in residential, commercial, and industrial settings.
