# Container energy storage box manufacturer in Antwerp Belgium

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore "energy atoll" (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

How much storage capacity does Antwerp have?

Together, more than 20 terminals offer around 9.5 million m<sup>3</sup> of independent storage capacity for liquid bulk: 8.9 million m<sup>3</sup> in Antwerp and 643.000 m<sup>3</sup> in Zeebrugge. Many sites are licensed for the storage of various categories of hazardous cargo, packaged in drums, IBCs or ISO tank containers.

What is the chemical cluster in Antwerp?

The chemical cluster in Antwerp is the largest in Europe and the most versatile in the world. The wide range of chemical companies generates an extensive network of logistics experts, guaranteeing the safe and high-quality storage, handling and distribution of chemicals, petroleum derivatives and gases.

How many kWh are in a battery storage container?

Each battery energy storage container unit is composed of 16 165.89 kWh battery cabinets, junction cabinets, power distribution cabinets, as well as battery management system (BMS), and the auxiliary systems of distribution, environmental control, fire protection, illumination, etc. inside the container; the battery container is 40 feet in size.
