# Cost of 8kw solar power generation system in Toronto Canada

How much does a solar system cost in Ontario?

Based on recent data, the average installation cost in Ontario for 2025 sits somewhere between \$2.40 and \$3.00 per watt. So, what does that mean for a typical family home? Most households need a system between 5 kW and 10 kW to cover a good portion of their energy needs. A 5 kW solar energy system will likely cost you between \$12,000 and \$15,000.

How much does a solar panel cost in Canada?

In 2024, the average solar panel cost in Canada ranges between \$2.50 and 3.50 per watt before incentives. For a standard 6 kW system, this equates to 15,000-21,000 upfront. However, federal and provincial rebates can slash this figure by 30-50%. For instance: The Canada Greener Homes Grant offers up to \$5,600 for solar installations.

Can a 7 kW solar system Save Ontario?

A standard 7 kW solar panel system in southern Ontario can prevent over 4 tonnes of carbon emissions from entering the atmosphere each year. That's like taking a car off the road. By generating your own clean energy, you're doing your part to help Ontario move away from fossil fuels and build a more resilient grid.

How much energy does a solar system produce in Ontario?

Every kilowatt-hour your panels produce is one you don't have to buy from the grid at the highest rates. An average solar system in Ontario (around 7 kW) can produce about 8,000 kWh per year. At an average rate of \$0.13/kWh, that's over \$1,000 in energy savings in the first year alone.
