## Côte d'Ivoire's new solar container outdoor power

Who will build a solar PV plant in Côte d'Ivoire?

Abidjan, Côte d'Ivoire, August 7th, 2025 - IFC and the Government of Côte d'Ivoire today announced Infinity Power Holding as the winning bidder to design, finance, build, and operate two grid-connected solar PV plants in Côte d'Ivoire.

Will Côte d'Ivoire have a solar power plant?

The solar power plant is then expected to be the largest in West Africa. The further expansion of solar energy in Côte d'Ivoire will primarily be realised by private investors. The successful project in Boundiali demonstrates to them that large solar projects are technically and financially feasible in similar countries.

How will a new solar power plant benefit Côte d'Ivoire?

The clean electricity generated in this way can supply 35,000 households, benefiting around 150,000 people. The new plant will save 35,000 tonnes of greenhouse gas emissions every year - an important contribution to climate protection. The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire.

When will a solar power plant open in Côte d'Ivoire?

In the northern region of the Côte d'Ivoire, the first phase of a solar power facility has been officially opened. The Boundiali solar power plant's financing was initially revealed in 2018, and details of its commissioning were made public in December 2022.

Jinko Solar continues to expand its global footprint with a powerful new milestone in Africa's renewable energy landscape! Jinko is proud to announce its role in powering Côte d'Ivoire's new solar power plant. The plant, located in the northern region of the country, will have a capacity of 50 MW and is expected to be completed by the end of 2025. The project is part of the government's broader goal to transition to a more sustainable energy future. The new plant will not only help to reduce greenhouse gas emissions but will also provide clean energy to thousands of households and businesses in the region. Jinko Solar is committed to supporting this important initiative and looks forward to continuing to play a role in the development of Africa's renewable energy sector.

Côte d'Ivoire has taken another major step toward strengthening its clean-energy transition with the launch of two international tenders for large-scale solar power projects. The tenders, which are being organized by the government of Côte d'Ivoire, aim to develop a total of 100 MW of solar power capacity by 2025. The tenders are open to international companies and will be evaluated based on a combination of price, technical expertise, and environmental impact. The new solar power plants will help to reduce Côte d'Ivoire's dependence on fossil fuels and will provide a reliable source of clean energy for the country's growing population.
