Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

Which country has the most energy storage systems in Europe?

With more than 20,000 megawatts, Spain is the country with the largest number of energy storage systems in Europe measured by power, and has the second largest number of projects: 128 in total; second only to Germany's 169.

What is the smallest energy storage system?

P50(VCUBE50) is the smallest of the E22's VCUBE series. This electrical 50kW energy storage system is an electro-chemical all vanadium product with four (4) hours of energy storage ready to discharge at rated power.
