# Delivery time of ultra-large capacity mobile energy storage containers

What is CATL TENER energy storage?

To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution. It breaks the limitations of power capacity and product transportation, and makes breakthroughs in space utilization, energy efficiency, and cost.

How does a 9mwh EV storage system work?

With a single unit storing 9MWh--enough to power 150 EVs or sustain a German household for six years--the system drastically reduces land use. Developers deploying 800MWh storage can cut container numbers by one-third and boost land efficiency by 40%, lowering total construction costs by up to 20%.

Is 9 MWh the limit of energy capacity?

"9 MWh is not the limit of the energy capacity or space. Every breakthrough in energy density in the future will unleash greater energy value from a smaller footprint." Hank Zhao, CTO of ESS Europe CATL. According to the Chinese company, this new product enhances land-use efficiency by 40% and reduces total station construction costs by 20%.

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, ...

CATL debuts 9MWh TENER Stack, the world's first ultra-large energy storage system with split-design transport compliance, 5-year zero-degradation cells, 20% cost ...

The energy storage industry just crossed another important milestone. CATL has launched the world's first 9MWh energy storage ...

MUNICH, May 7, 2025 /PRNewswire/ -- CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large capacity ...

At CES Europe 2025, CATL launched TENER Stack, the world's first mass-produced 9MWh ultra-large-scale energy storage solution, setting a new industry benchmark ...

In April 2024, CATL unveiled a 6.25 MWh capacity energy storage system called TENER, promising zero degradation in the first five years of use--the first of its kind.

MUNICH, May 7, 2025 /PRNewswire/ -- CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass ...

CATL's TENER Stack: A Game-Changer in Energy Storage Innovation Global battery giant  
CATL has raised the bar for large-scale ...

CATL's TENER Stack: A Game-Changer in Energy Storage Innovation Global battery giant  
CATL has raised the bar for large-scale energy storage solutions with the debut ...

On May 7, CATL unveiled TENER Stack, the world's first mass-produced 9MWh ultra-large-capacity energy storage system solution, at the Battery Energy Storage Exhibition ...

On May 7, 2025, CATL unveiled the TENER Stack at the EES Europe trade fair in Munich, Germany, introducing the world's first mass-producible 9MWh ultra-large-capacity ...
