# **Do you need to bring an solar container outdoor power when you go to North Macedonia**

Are solar panels allowed on planes?

Yes, portable solar panels are generally allowed on planes, but there are a few caveats to keep in mind. Most airlines permit solar panels as part of your carry-on or checked luggage. However, the size, weight, and type of the panel might determine whether additional restrictions apply.

How to travel with solar panels?

Traveling with solar panels requires careful preparation to avoid damage and delays at security checkpoints. First, ensure your solar panels are clean and free of any sharp edges or protrusions. Use a padded case or protective covering to shield the panels from impacts.

Do voltaic solar panels need a battery pack?

Since Voltaic solar panels are separate from our battery packs, these rugged panels do not face any regulation and can be stored in your checked or carry-on bag. On the other hand, spare lithium ion battery packs (including Voltaic's V15, V50, and V88) are subject to some limitations, please read below.

Can you take a solar power bank on a plane?

Solar power banks are highly convenient for travelers. Luckily, they are permitted on planes, provided they comply with airline regulations. The same rules for batteries apply: power banks with a capacity of up to 100 Wh are universally accepted in carry-on luggage. Larger capacities require prior approval from the airline.
