
Dublin Base Station Solar Platform

How many solar panels are installed at Dublin Airport?

Dublin Airport's 9MW solar farm was officially inaugurated yesterday, 7th April 2025, by the Minister of Transport in Ireland, Darragh O'Brien. More than 15,000 solar panels, installed across 28 acres near the south runway, are now generating clean electricity right where it's needed.

Will A 9MW solar farm power Dublin Airport?

This 9MW solar farm designed, constructed and installed by Greenvolt Next is set to power the airport with clean renewable energy. 'It will supply 10% of Dublin Airport's current annual electricity needs'.

Will Dublin Airport switch on Phase 1 of its new solar farm?

Seeing Dublin Airport officially switch on Phase 1 of its new solar farm through our partnership is a significant milestone. Dublin Airport's 9MW solar farm was officially inaugurated yesterday, 7th April 2025, by the Minister of Transport in Ireland, Darragh O'Brien.

Does Dublin Airport need solar power?

Subject to planning permission, Phase 2 envisages the staged deployment of an additional 6,000 solar panels by late 2027. This is sufficient to fully power the baggage systems in Terminals 1 and 2 and means a further 4% - 6% of the annual electricity needs of Dublin Airport will come from renewable energy generated onsite.

Sigfox Ireland currently have nationwide coverage in Ireland using mains powered base station sites throughout the country. The aim of the work carried out by WiSAR Lab was to investigate
