# EU Energy Storage Power Station Plan

What is the European energy storage inventory?

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, marking a major step toward a smarter and more sustainable energy system.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

What is the European Grid package?

The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus on driving energy storage capacity to encourage investment in clean energy-based electrification.

Will the European battery storage market drop in 2025?

Historically, home batteries have driven the European battery storage market, but 2025 will mark their drop to represent 33% of the market. As the effects of the energy crisis wane - and related support schemes - European citizens are less inclined to install batteries at home.

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

The Action Plan for Affordable Energy, also presented early 2025, sets out that the European Grids Package will include legislative proposals to accelerate permitting for grids, ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP ...

New report: European battery storage grows 15% in 2024, EU energy storage action plan needed Press Release 7 May 2025 MUNICH, Germany (Wednesday 7th May ...

International energy consultancy Wood Mackenzie has released groundbreaking research

---

showing Europe's battery energy storage system (BESS) market is experiencing ...

The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus on driving energy storage capacity to ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...

The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, ...

The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus ...
