
EU Solar Order Management System

How can I follow the development of the European solar value chain?

You can follow the development of the European solar value chain via SolarPower Europe's interactive Solar PV Manufacturing map. Building on the work of ESI, the European Commission will launch the landmark EU Solar PV Initiative in late 2022, as part of the EU Solar Strategy.

What is Solarpower Europe?

SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European energy system. Get to know everything about solar power. Interested in joining SolarPower Europe? Become a member! If playback doesn't begin shortly, try restarting your device.

When will the European Solar charter be implemented?

One year following the signature of the Charter, the Commission will review the implementation of the adopted commitments. The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

What is the European Solar charter?

To this end, the European Solar Charter sets out immediate actions to be taken by the Commission, EU Member States and the representatives of the solar PV value chain, in particular wholesale, distribution and manufacturing parts, to be implemented ensuring full compliance with EU competition law and state aid rules.

Europe relies on solar photovoltaic (PV) as one of the main energy sources in its climate roadmap. Europe has been a pioneer and ...

The European Union (EU) was the first to adopt PV-specific waste regulations by mandating the recycling of all solar panels under the Waste Electrical and Electronic ...

Sunrock soars, winning the Gold European Solar Sustainability Award 2025 SolarPower Europe is the award-winning link between policymakers and the solar PV value ...

An OMS manages equipment purchases, shipping, inventory, and delivery workflows for solar installers and EPCs.

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The contribution of European solar mounting system manufacturers and their technologies to the region's solar success is the ...

In order to fulfill the Sustainable Development Goals, renewable energy systems are currently in the spotlight. The renewable ...

These systems reduce human error, accelerate processing times, and allow staff to focus on strategic activities that add more value to the supply chain. For European solar ...

PVTIME - Under its Net Zero Industry Act, the EU has introduced new legislation imposing a 30% local manufacturing ...

Europe relies on solar photovoltaic (PV) as one of the main energy sources in its climate roadmap. Europe has been a pioneer and leader in PV production, and the installation ...

These systems reduce human error, accelerate processing times, and allow staff to focus on strategic activities that add more value ...

The Funding and Tenders Portal is the single entry point (the Single Electronic Data Interchange Area) for applicants, contractors and experts in funding programmes and ...
