
Earth leakage breaker factory in Bolivia

What is an earth leakage circuit breaker (ELCB)?

Earth Leakage Circuit Breakers (ELCBs) are electrical devices designed for your safety and protection from potential electric shocks. This electrical device detects small stray voltages on the metal casings of your electrical equipment. If the ELCB recognizes a dangerous voltage level, it immediately interrupts the circuit.

How does an earth leakage circuit breaker work?

Our earth leakage circuit breaker is generally composed of a ZCT (Zero-phase-sequence Current Transformer) + Earth leakage relay + Circuit breaker. The ZCT detects earth leakage current, notifies the electronic circuit, and shuts off the circuit using an internal tripping device.

Are earth leakage circuit breakers safe?

Earth Leakage Circuit Breakers or ELCBs provide the utmost safety for you and your space by preventing earth faults from your equipment. With the right installation process and ELCB quality, you can be assured that your residential, commercial, or industrial space is safe from potential electrical shocks and damages.

Can an earth leakage circuit breaker cause a fire?

A leakage current of 100 mA or more can cause a fire. An earth leakage circuit breaker detects earth leakage of approximately 15 to 30 mA, and immediately shuts off the circuit within 0.1 seconds, preventing an accident.

Auto Die Cast is a foremost company offering premium quality Earth Leakage Circuit Breaker In Bolivia. We are the one-stop, where you can get excellent products without breaking your ...
