
Ethiopia power generation side energy storage subsidies

Does Ethiopia have a reliable electricity supply?

Despite its leadership in renewable energy, nearly 50% of Ethiopia's population still lacks access to reliable electricity.

Who owns the energy grid in Ethiopia?

It is the biggest player in the Ethiopian energy sector. EEP owns and operates the national power grid, including all high-voltage lines (over 66 kV), all the associated substations and nearly all the power stations on the grid (some power plants belong to the state-owned Ethiopian Sugar Corporation).

Why is Ethiopia a critical juncture in its energy journey?

Ethiopia stands at a critical juncture in its energy journey. The country has ambitious plans to harness its vast renewable energy potential, reform its power sector, and achieve universal electricity access. While these goals offer tremendous opportunities, they also present significant challenges.

Why does Ethiopia need ffeg?

The inclusion of FFEG, despite Ethiopia's reliance on renewable energy, allows for a comprehensive assessment of the country's broader energy mix and the potential impact of policy shifts and transition dynamics as it develops its energy infrastructure.
