
Factory price d curve breaker in Finland

How has Finland embraced dynamic pricing?

Legal and Regulatory Framework: Finland's embrace of dynamic pricing has been facilitated by supportive policies. At the EU level, the Electricity Market Directive (2019/944) and related regulations establish the right for consumers with smart meters to have dynamic price contracts and require suppliers to offer them.

Does Finland have a spot-priced electricity market?

Finland's extensive use of spot-priced contracts (see next section) means many consumers experienced price volatility, but over the year Finnish retail prices (~15-20 c/kWh for households) remained moderate by European standards.

What is the Nordic market structure?

The Nordic market structure - with Nord Pool's day-ahead and intraday markets - provides the foundation, and Finland's laws ensure suppliers and infrastructure keep up. By 2025, it's effectively standard that any consumer can opt for a contract indexed to hourly market prices.

How do electricity prices work in Finland?

Electricity retail prices in Finland are unbundled into several components. End-users pay for the energy itself and the delivery of that energy, plus government taxes. In practice, an electricity bill has three main parts: energy, network (transmission/distribution), and taxes, all of which are subject to VAT.
