## Factory price incomer breaker in Dominican-Republic

Is the Dominican Republic a good place to invest in PCB manufacturing?

The Dominican Republic is a prime candidate to capture increased North American investment in printed circuit board (PCB) manufacturing and offers considerable attractiveness as a destination for near-shored semiconductor assembly, test, and packaging (ATP) activity, in which semiconductors are tested and assembled into sophisticated packages.

What is the manufacturing environment like in the Dominican Republic?

The Dominican Republic offers a cost-competitive manufacturing environment. Two of the most notable electronics manufacturers in the Dominican Republic are Eaton Corporation and Rockwell Automation.

What makes the Dominican Republic a good country for electronics manufacturing?

The 25 leading electronics manufacturers operating in the Dominican Republic's FZs provide a well-developed advanced electronics manufacturing base to serve as a springboard for the country getting into semiconductor ATP and PCB manufacturing.

How can the Dominican Republic help the semiconductor industry?

As such, the Dominican Republic is poised to both play an important role in helping diversity and make more sustainable and resilient global supply chains in the semiconductor sector.
