
German LNG power station generator set

What is German LNG?

I suggest you upgrade your browser. German LNG will be the first onshore regasification terminal in Germany, and it will allow the country to inject gas to the national network from the sea. It is a strategic project for the energy transition process which will make a significant contribution to the energy supply of Germany and Europe.

Could German LNG replace Russian pipeline gas?

(German with English subtitles) Liquefied natural gas (LNG) has played a key role in Germany's energy security since the Ukraine War. In the medium term, the import could replace Russian pipeline gas. On behalf of the German Federal Government, KfW is now participating in the construction of Germany's first LNG terminal in Brunsbütetel.

Will Germany's first LNG terminal be built in Brunsbütetel?

Liquefied natural gas (LNG) has played a key role in Germany's energy security since the Ukraine War. In the medium term, the import will replace Russian pipeline gas. On behalf of the German Federal Government, KfW is now participating in the construction of Germany's first LNG terminal in Brunsbütetel.

Will the German LNG terminal be converted to import?

By 2043 at the latest, the terminal will be converted to import a more contemporary form of energy, probably hydrogen derivatives. We, German LNG Terminal GmbH, based in Brunsbütetel, are the builders and operators of the import terminal. Our team of specialists is managing the careful and rapid implementation of this important large-scale project.

German LNG will be the first onshore regasification terminal in Germany, and it will allow the country to inject gas to the national network from the sea. It is a strategic project for the energy ...

An extensive network of LNG filling stations is the basis for environmentally friendly transport throughout Germany. More than 100 LNG filling stations are already in use by freight ...

German LNG will be the first onshore regasification terminal in Germany, and it will allow the country to inject gas to the ...

Qingdao En Energy Technology Co., Ltd. provides gas generator sets from 5kW to 3000kW, specializing in oil field, CNG/LNG plant applications, offering comprehensive ...

Germany has looked to liquefied natural gas (LNG) imports to replace piped Russian gas since Moscow's invasion of Ukraine in 2022. Its first move has been to deploy ...

A substantial part of this growth will come from the development of small and medium size LNG receiving and re-gas terminals. This demand for LNG terminals is ...

The Heilbronn CHP plant is a combined heat and power station owned and operated by Energie Baden-Württemberg (EnBW).

mtu natural gas generator sets utilize cutting-edge technology that offers combined heat and power (CHP), as well as combined heat, power, and cooling (CHPC) for ultimate efficiency. All ...

The perfect solution for each Use-Case The ENERGIN®; M series Gas engines form the base for a range of efficient power generation products. Depending on your projects ...

Regulation in Germany Access Regulation Tariff and Cost Regulation of LNG Facilities Transparency Requirements In Germany, LNG facilities are subject to access and tariff regulation as these facilities are classed as gas supply networks. In addition, there are the directly applicable European provisions from Regulation (EC) 715/2009 of the European Parliament and of the Council of 13 July 2009, the LNG Ordinance and German Energy Industry Act.
