
Global demand for new energy storage

The global Battery Energy Storage Systems (BESS) market is growing at a rapid pace. The expansion is driven by the rise of renewable energy, the increasing need for grid ...

Global energy storage system (ESS) shipments soared to a record 286 GWh in 2025, with industry heavyweights like Tesla and leading Chinese manufacturers such as BYD ...

This report comes to you at the turning of the tide for energy storage: after two years of rising prices and supply chain disruptions, the energy storage industry is starting to see price ...

The global energy storage technology landscape is increasingly influenced by the demand for long- duration energy storage (LDES), typically defined as storage lasting beyond ...

Mainland China accounts for the majority of global energy storage demand, particularly driven by regional needs for new utility-scale wind and solar projects to incorporate ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

(Yicai) Dec. 10 -- Global shipments of energy storage batteries are expected to grow by 30 to 40 percent year on year next year, falling short of this year's anticipated increase of ...

As the world accelerates toward cleaner and more resilient power systems, Battery Energy Storage Systems (BESS) have become one of the most critical technologies enabling ...

2025, Chinese energy storage companies have seen an explosion in overseas orders. According to authoritative data from REBIO GROUP, in the first half of 2025 alone, ...

We explore the data to see where the clean energy transition stands today, from rising investment and job growth to grid needs and critical mineral demand.
