
High-efficiency folding container in Southeast Asia

Which container port is most efficient in Southeast Asia?

Efficiency scores of containers ports in Southeast Asia using super-efficiency model. Judged by its super-efficiency score of 1.282, Laem Chabang port is the most efficient container port, compared to others in the region.

How does foldpac improve container loading efficiency?

By reducing weight and height through material improvements and design enhancements compared to standard steel IBCs, FOLDPAC achieves lightweight, high-strength, and high-efficiency characteristics, resulting in a 125% improvement in container loading efficiency.

Are container ports de-concentrated in Southeast Asia?

The port of Singapore alone - the biggest container port in the region - comprised over 40% of the region's total throughput during 2007 but only 30% in 2017, clearly suggesting a tendency towards de-concentration in the region. Fig. 4. Cumulative market share of top ten container ports in Southeast Asia. 4.2. Concentration ratio (CR 4)

What is the growth rate of container ports in Southeast Asia?

It is notable that the ports handling >5 million TEUs in 2017 (Port Klang, Tanjung Pelepas, Laem Chabang, Saigon, and Tanjung Priok) have been developing with a sound growth rate of 4.6% on average. Table 2. Container throughput of major container ports in Southeast Asia (in thousand TEUs).
