
High quality hybrid inverters in Mozambique

What is a hybrid solar inverter?

Like regular string solar inverters, hybrid inverters convert solar DC power from strings of solar panels to AC (alternating current) power used to power your home. However, unlike solar inverters, excess solar energy is used to charge a connected battery system or exported to the electricity grid. Household loads first, grid export last.

How do I choose a hybrid inverter?

When evaluating a hybrid inverter, it's important to inquire about these capabilities and how they can be customized to suit your needs and preferences. Jason Svarc is an accredited solar and battery specialist who has been designing and installing solar and battery systems for over a decade.
