## How many 5G base stations does Vietnam Mobile have

How many 5G stations does Viettel have?

According to Nokia, the equipment was manufactured locally. By the network launch on October 15, Viettel claimed to have installed more than 6,500 5G base transceiver stations, covering all 63 provincial capitals, industrial zones, tourist sites, ports, airports, hospitals, and universities.

Is 5G available in Vietnam?

While 5G has been available in many Asian markets for some time, users in Vietnam were forced to wait for their first taste of the new technology. The country's three largest mobile network operators (MNOs) were awarded 5G-suitable spectrum in the first half of last year.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

How much power does a 5G base station use?

Each nation has a different 5G strategy. For 5G, China uses 3.5GHz as the frequency. Then, a 5G base station resembles a 4G system, but it's on a much larger scale. For sub-6GHz in 5G, let's say you have a macro base station. The power levels at the antenna range from 40 watts, 80 watts or 100 watts.

Vietnam's leading mobile operators--Viettel, VNPT, and MobiFone--are accelerating their 5G expansion, deploying a total of 11,000 base stations throughout the ...

Vietnam's leading mobile operators--Viettel, VNPT, and MobiFone--are ramping up their 5G rollout, collectively deploying 11,000 ...
