
How much does a South Sudan energy storage power supply cost

What is the demand for electricity in South Sudan?

There is also significant demand for electricity in the rural areas with only about 1 % of the population connected to the grid. According to recent projections, in the long term, the demand for electricity in South Sudan could grow to 1400 MW by 2030.

Why is South Sudan struggling to get electricity?

Despite having an abundance of energy resources, particularly fossil fuels, South Sudan struggles to give its citizens access to electricity. The long period of historical neglect of the region by the Sudanese government before independence and the recent conflict, is the primary cause of the current energy challenges.
