## How much does a mini base station cost

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

Are small cell base stations a good idea?

Small cell base stations are more useful than ever with the ubiquity of smartphones, rising data usage, and the advent of 5G. However, small cell base station designs must meet these demands as well as weight and volume restrictions, without sacrificing performance or significantly increasing power consumption.

How much does satellite backhaul cost?

However, it comes at a steep price, with costs reaching up to \$500 per Mbps, much higher than fiber-based solutions. Satellite backhaul is crucial for extending 5G coverage to underserved areas, including islands, mountainous regions, and disaster-prone zones.

Does CableFree offer a 5Ghz base station?

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE without requiring access to licensed spectrum. Band 46 covers 5150 - 5925MHz and uses TDD-LTE technology. Contact CableFree for details.
