
How to check the date of new energy battery cabinet

How do I know if a battery has a manufacturing date?

To check a battery's manufacturing date, locate alphanumeric codes stamped on the casing or label, often following standards like IEC 60086 (YYYY-MM) or Julian date codes (e.g., 23056 = 2023's 56th day). Use manufacturer guides, mobile apps, or BMS data for decoding. Lithium-ion batteries may embed dates in QR codes.

How do you know if a battery has a manufacturing code?

The manufacturing code for batteries can typically be found on the battery itself or on its packaging. It is usually a combination of letters and numbers that indicate the date of production. By decoding this code, you can determine when the battery was manufactured.

What does the battery expiration date code mean?

How do I find the date code on a battery?

One way to find the date code on a battery is to look for a shipping or production date. This information is often printed on the battery's label or etched onto its casing. The format of the date code may vary, but it usually includes the month and year of manufacturing.

What does a battery date code look like?

The format of the date code may vary, but it usually includes the month and year of manufacturing. For example, a date code may look like "C1419," where "C" represents the month (March) and "14" indicates the year (2014). In some cases, the date code may be hidden within a longer battery code.
