
How to choose a wireless outdoor base station AP

How do I choose the best outdoor access point?

When choosing the best outdoor access point, consider factors like range, speed, weatherproofing, and compatibility with your existing network. Ultimately, the best choice will depend on your specific needs and budget, but our top picks provide a solid starting point for anyone looking to boost their outdoor connectivity.

What is the difference between indoor and outdoor access points?

Outdoor access points are built to withstand harsh weather conditions and have higher IP ratings for water and dust resistance, whereas indoor access points are not designed for such conditions. Do I need an outdoor access point if I only want coverage for a backyard?

Should I use an outdoor access point outside?

If your backyard is exposed to rain, extreme temperatures, or dust, an outdoor access point is recommended for durability and better performance. Can I use an indoor access point outside with a weatherproof enclosure?

What is a wireless access point (WAP)?

A wireless access point (WAP), also called an access point (AP), is a compact electronic device that allows other Wi-Fi devices to connect to a wired or wireless network. WAP devices create a Wi-Fi network within an existing wired or wireless network to accommodate more wireless devices.
