
Huawei exports solar cell components

How many solar cells did China Export in 2024?

Chinese cell and module exports grew in 2024, according to customs data. Image: Trina Solar. China exported 7.79 billion solar cells in 2024, a year-on-year increase of 38.2%, according to the latest date from Chinese customs.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

How much do solar panels export in China?

In 2023, solar PV module exports in China surpassed 212 gigawatts. Meanwhile, China's export volume of solar cells stood at 39 gigawatts that same year. The export value of solar photovoltaic equipment reached 52 billion U.S. dollars in 2022. Get notified via email when this statistic is updated. Access limited to Free Statistics.

Which countries export solar products?

As such, there has been a major rise in solar exports, with commodities like solar batteries, PV modules, panels, and silicon wafers being shipped globally. One of the major global leaders in the manufacturing and exportation of solar commodities is China.

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

India's demand for solar cells sees exports of the product from China increase by over 70% in the first half of 2025, doubling to 40% of all solar products as solar panel exports ...

HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Chinese solar exports at an all-time high despite drop in revenue China's 2023 solar exports hit a record high with over 40% ...

Cells and wafers accounted for over 40% of China's product exports in the first half of 2025, according to the latest report from energy think tank Ember. The first six months of ...

Solar cell and solar wafer exports from China increased significantly during the first half of the year, according to analysis by London-based think tank Ember Energy. Figures from ...

Solar PV export volume in China 2021-2024, by component Published by Luc Fernández, Nov 28, 2025 In 2024, solar PV module ...

Solar cell and solar wafer exports from China increased significantly during the first half of the year, according to analysis by ...

Discover the latest updates in solar exports in China, factors driving growth & how MSC's dedicated global teams provide solar solutions on a global scale.

According to industry analysts, China's increasing dominance in the solar industry, along with its high-tech and high-value exports, including solar products and lithium batteries, ...

Chinese solar exports at an all-time high despite drop in revenue China's 2023 solar exports hit a record high with over 40% growth for all equipment. The surge was dominated by ...
