
Huawei large energy storage vehicle sales

How much did Huawei sell last year?

The Huawei group posted sales of 4.7 billion yuan (about \$640 million) from its new vehicle division last year, more than double the previous year but still less than 1% of the group's total sales (704 billion yuan, about \$96.3 billion).

Why is Huawei entering the automotive market?

Huawei's entry into the automotive market comes as the industry experiences significant shifts. For decades, the car market has been dominated by American, European, and, more recently, Japanese and Korean companies, which also control the resources and technology used to make electric vehicles.

Is Huawei a leading supplier of smart vehicle technology?

Instead, it provides automotive components, emphasizing autonomous driving systems through its Huawei Inside (HI) model. Some see this move as Huawei positioning itself as a leading supplier of smart vehicle technology, especially as it forms more partnerships in the automotive industry.

Does Huawei make cars?

Here's What You Need to Know China's Huawei will spin off its intelligent automobile business unit into a Shenzhen Yinwang Intelligent Technology subsidiary by January 1, 2025. As the Chinese economic media Caixin reported, Huawei's automotive division, established in 2019, doesn't manufacture vehicles.
