
Icelandic home solar lights

Why should you visit the Northern Lights in Iceland?

There are many advantages to seeing the Northern Lights in Iceland, such as the abundance of dark places far from anywhere impacted by light pollution. If you live in a more densely populated area, it's hard to be able to get far enough away from towns and cities to be able to escape the distant glow of lights and find somewhere really dark.

Where can I see the Northern Lights in Reykjavik?

At Perlan, reached by Reykjavik's Hop On, Hop Off sightseeing bus, the "Aurora Show" uses 8K projection and surround sound showcases breathtakingly cinematic footage of the Northern Lights within a 150-seat planetarium. We Icelanders are used to seeing the Northern Lights and have plenty of advice to help you ensure your aurora quest is successful.

What are indoor solar lights?

Indoor solar lights are lighting fixtures that harness the power of the sun to illuminate your interior spaces. Unlike traditional lighting systems that rely on electricity, these lights use solar panels to absorb sunlight during the day and store the energy in rechargeable batteries.

Why is the aurora borealis so popular in Iceland?

Iceland's northerly location close to the Arctic Circle means that the aurora borealis is a frequent visitor to its skies. Yet unlike fireworks displays and drone shows, its appearance can never be guaranteed, and it's this unpredictability that helps account for its irresistible appeal.
