
Illegal production of solar glass

Why did India impose anti-dumping duties on Chinese PV solar glass?

This price suppression had a long-lasting effect, preventing domestic producers from adjusting their prices in line with rising production costs and causing substantial losses to the domestic industry. India has conducted several anti-dumping investigations and imposed anti-dumping duties on Chinese PV solar glass.

What will happen if solar glass is not used in Europe?

Without including solar glass as the most energy-intensive and heaviest component, dependence on China in the solar market will remain. The current estimated gap in solar glass for European manufacturing will grow from 80 per cent to 95 per cent due to expansion plans up to 30 gigawatts.

Are solar glass imports a problem in India?

The Directorate General of Trade Remedies (DGTR) found that these imports, which account for 98% of India's solar glass needs, significantly undercut local prices and recommended the duties. What does SAMA say?

Where does solar glass come from?

A nominal proportion of the glass was imported from India and a few other countries until 2021. It is striking that the largest European solar glass supplier, Interfloat, with its production GMB Glasmanufaktur Brandenburg in Tschernitz was sold to the Indian market leader Borosil in April 2022.

The applicant further alleges that the European Union is a commercially attractive market for solar glass with relatively high market prices that so would incite the Chinese ...

India's Directorate General of Trade Remedies (DGTR) has recommended an anti-dumping duty on solar glass imports from China and Vietnam after its investigation concluded ...

Solar panels used widely across Ireland were sourced from companies linked to forced labour and environmental devastation in the Xinjiang region of China.
