# Indoor charging of portable energy storage power supply

How long does it take to charge a portable power station?

Some units recharge to 80% in under an hour--while others take 6-8 hours or more. Faster charging is especially useful if you're cycling power usage throughout the day or topping off before a storm hits. Not all portable power stations are truly "portable." Some weigh over 100 pounds, especially expandable or high-capacity systems.

What is a portable power station?

A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage? Run time depends on capacity and load.

What is the best portable power station for home backup?

Key Details: Need something that grows with your power needs? The Jackery Explorer 2000 Plus kit is hands-down the best expandable portable power station for home backup. The base unit plus one expansion battery already delivers over 4kWh, and serious users can push that all the way up to 24kWh with parallel stacking.

How much does a portable power station weigh?

Faster charging is especially useful if you're cycling power usage throughout the day or topping off before a storm hits. Not all portable power stations are truly "portable." Some weigh over 100 pounds, especially expandable or high-capacity systems. For RV trips or apartment use, a compact, under-50 lb model may be more manageable.
