# Is the new energy storage industry a manufacturing industry

How will China's new-energy storage industry grow by 2027?

Photo: VCG China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation and competitiveness, and achieve high-end, intelligent and green industry growth.

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

What is MIIT's new energy storage plan?

The plan, jointly issued by eight departments including the Ministry of Industry and Information Technology (MIIT) on Monday, seeks to foster high-quality development in the new-energy storage manufacturing.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

The plan focuses on technological innovation, including the upgrading of lithium batteries and support for disruptive technologies. China's Ministry of Industry and Information ...

Energy Storage Manufacturing Analysis NLR's advanced manufacturing researchers provide state-of-the-art energy storage analysis exploring circular economy, ...

The Energy Storage Market is expected to reach USD 295 billion in 2025 and grow at a CAGR of 9.53% to reach USD 465 billion by ...

Megapack is an electrochemical energy storage device that uses lithium batteries, a dominant technical route in the new-type energy storage industry. Tesla's vice-president Tao ...

The plan focuses on technological innovation, including the upgrading of lithium batteries and support for disruptive technologies. ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's ...

The battery industry has entered a new phase - A commentary by Teo Lombardo, Leonardo Paoli, Araceli Fernandez Pales, Timur G&#252;l

---

Energy Storage Manufacturing Analysis NLR's advanced manufacturing researchers provide state-of-the-art energy storage ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to ...

Xinhua News Agency, Beijing, February 17 (Reporter Zhang Xiaojie and Zhang Xinxin) The reporter learned from the Ministry of Industry and Information Technology on the ...

Megapack is an electrochemical energy storage device that uses lithium batteries, a dominant technical route in the new-type energy ...

According to the "Energy Storage Industry Research White Paper 2025" released during the recently concluded 13th Energy Storage International Conference and Expo held in ...
