
Jamaica Local Communications BESS Power Station Company

Can JPS distribute electricity in Jamaica?

While Jamaica has several firms that generate electricity, only JPS can distribute the power, due to its exclusive licence with the Jamaican government as operator of the national grid.

What does Bess mean for Jamaica?

With BESS, Jamaica gains not only energy security, but also economic flexibility--especially in areas underserved by the traditional grid. Jamaica is committed to reducing its dependence on imported fossil fuels. The country's National Energy Policy sets an ambitious target: 50% of electricity from renewable sources by 2037.

Who buys electricity in Jamaica?

JPS also purchases additional electricity close to 297 MW from Independent Power Producers (IPPs) such as Jamaica Energy Partners (JEP), Jamaica Private Power Company (JPPC), Jamalco, and Wigton Wind Farm. The grid currently provides electricity access to approximately 97% of Jamaican households. Jamaica Energy Partners (JEP)

What is Jamaica public service company (JPS)?

For over 100 years Jamaica Public Service Company (JPS) has served the island of Jamaica's energy needs, but recently it has faced one of its biggest challenges. Jamaica Public Service Company (JPS) has provided Jamaica's power generation, transmission, and distribution needs for just over a century as its sole electricity provider.

The Company owns and operates: 4 power stations, 9 hydroelectric plants, and 1 wind farm. Along with the provision of electricity, JPS is a key partner in national development.
