
Malaysia Solar Drip Irrigation System

Can a solar-powered drip irrigation system be installed in a garden?

Solar-powered drip irrigation can be installed in most gardens using a small solar system, readily available irrigation materials, and minimal tools. If you already have a home solar system, it can be tapped into without installing a dedicated system.

What is a solar drip irrigation system?

The solar drip irrigation system is completely automatic and it is a smart irrigation controller. The irrigation is controlled by the prevailing weather conditions rather than a program. You can also adjust the water usage by adjusting the control dripper.

How much does a solar-powered irrigation system cost in Malawi?

In Malawi, a solar-powered irrigation system, consisting of a solar-powered submersible pump, water tank, and drip irrigation lines covering an area of 500m², is provided on loan to farmers. The approximately \$750 cost is more up front than the annual income for an average Malawian.

Why does Malaysia need an irrigation system?

This project is taken up as Malaysia is an agriculture oriented country and the rate at which water resources are depleting years by years due to increasing of the population. This system is to help and provide an irrigation system that will ease the burden of the users to take care of plants.
