
Male solar module export tariff

What tariffs are imposed on Chinese solar cells & modules?

The U.S. had imposed several trade barriers against Chinese solar cell and module imports. In addition to the original 25% tariff under the Section 301, there are anti-dumping and countervailing duties (AD/CVD) that have been imposed since 2012 as well as the Section 201 tariffs targeting cells and modules from all countries.

How will the 301 tariff affect the US solar supply chain?

Notably, the adjusted 301 tariff expands to cover Chinese exports of polysilicon and mono-Si wafers, with a 50% tariff rate set to take effect on January 1, 2025. This move is expected to affect the upstream sector in the US PV supply chain. The U.S. had imposed several trade barriers against Chinese solar cell and module imports.

Which solar companies do not incur import tariffs?

Other "Domestic" Suppliers: A few manufacturers with U.S.-based production or assembly - such as Hanwha Qcells (Georgia factories), First Solar (Ohio), Mission Solar (Texas), and Silfab (Washington) - do not incur these import tariffs on their U.S.-made panels. They have an effective price advantage now.

What are China's new tariffs on solar products?

The newly increased tariffs on imports from China, effective as of September 27, 2024, specifically target products vital to the solar industry: Solar cells and modules: Tariffs have doubled, increasing from 25% to 50%. Lithium-ion batteries: For electric vehicles, these batteries now face a tariff of 25%, up from 7.5%.

Solar Panel Price Changes (Wholesale Tier) U.S. solar module prices were already inching up in late Q1 2025 due to trade policy signals, ...

The report "Reconfiguring Globalisation: A Review of Tariffs, Industrial Policies, and the Global Solar PV Supply Chain" by The Oxford Institute For Energy Studies summarises: o ...

The report "Reconfiguring Globalisation: A Review of Tariffs, Industrial Policies, and the Global Solar PV Supply Chain" by The Oxford ...

India's solar exports vis a vis other countries could still continue to remain competitive, though the margins could take a marginal ...

QB 23-507 Solar Cells and Modules 2023 On February 4, 2022, the President signed Proclamation 10339 "To Continue Facilitating Positive Adjustment to Competition from Imports ...

Manufacturers and installers shift the burden of tariffs onto consumers. A \$1 tariff leads to a \$1.35 increase in the final prices. Tariffs ...

What a solar tariff is, the pros and cons of solar tariffs, a timeline of recent solar tariffs, and why tariffs matter to homeowners when ...

New 301 solar tariffs and trade investigations are likely to increase prices in the solar industry, especially on certain solar brands.

Navigating Photovoltaic Export Codes: A 2025 Trade Compliance Guide Decoding HS Codes for Solar Exports Ever tried explaining photovoltaic panel classifications to customs officials? It's ...

The Biden Administration directed the Trade Representative to increase tariffs under the Section 301 on September 13, 2024, raising tariff rates on cells and modules from ...

The US Department of Commerce published its final anti-dumping and countervailing duty tariff rates against solar PV (crystalline ...

Export photovoltaic Components are a trade activity with broad prospects, especially amid the accelerating global energy transition. Combined with the latest 2025 ...
