
Micro Inverter EZ1

What is EZ1 series solar inverter?

EZ1 series has 2 input channels with independent MPPTs and high input current and output power to match today's high power modules. Through Bluetooth connectivity, users can directly connect to the inverter and get real-time data of your solar system.

How does a EZ1 microinverter work?

In doing so, the EZ1 series can connect to a router not only via Bluetooth, but also via Wi-Fi to send data to cloud servers for remote monitoring. APsystems' EZ1-M-EU microinverter is an ideal choice for backyard and balcony power plants as it is specifically designed for small installations and features two MPP trackers.

What is a APsystems ez1-m microinverter?

Enhance your solar system with the APsystems EZ1-M microinverter. Featuring WiFi and Bluetooth connectivity, it offers easy control via the APsystems app. Adjust feed-in power from 0 to 800W effortlessly.

How to adjust the output power of the microinverter ez1-m?

Just so you know, the output power of the microinverter EZ1-M can be adjusted on the Zendure APP, but only if the microinverter EZ1-M was purchased from an authorized Zendure channel. You can identify these products by the Zendure sticker on the packaging surface and the Zendure instruction card inside the package.
