What Is an Uninterruptible Power Supply (UPS)?

Why should you choose SCU ups manufacturer?

SCU UPS manufacturer can make customized solutions for all kinds of special applications, such as customized uninterruptible power supply products and UPS electrical devices based on standardization.

What is an ups & how does it work?

An UPS is a device that supplies power to connected devices for a certain period of time in the event of a power failure due to a power failure. It has a built-in battery and supplies power to servers, PC electronic equipment, network equipment, etc. in the event of power failure or power supply trouble, for example.

What are the different types of uninterruptible power supplies?

Three main types of uninterruptible power supplies are currently used: offline, line interactive, and on-line systems. Offline UPS systems are standby systems that provide battery power to equipment when the main power supply falls underneath a certain limit. These are mostly used in home and office applications due to their lower cost.
