
Moscow 5G solar container communication station address

Is 5G coming to Moscow?

Moscow is now one of the cities where the testing of fifth generation communication - 5G - has already begun. These test operations anticipate the forthcoming commercial launch of the new technology. 5G is notable for gigabit speeds of data transfer, low latencies, high energy efficiency and ultra-high mobility for millions of connected devices.

How many Russian cities will have 5G infrastructure by 2030?

By 2030, 16 Russian cities will be provided with 5G infrastructure. This was announced on December 11 by the head of the Ministry of Digitization Maksut Shadaev. "In 2026 they (samples of Russian base stations. - Ed.) will go into production, and we will start building 5G infrastructure in two cities.

Will Russia create a single infrastructure operator for the 5G network?

On November 20, 2018, it became known about the creation in Russia of a single infrastructure operator for the development of the 5G network. The joint project of Rostelecom, MegaFon and Rostec should reduce the cost of deploying the fifth generation network, but there is a risk of limiting competition. Read more [here](#).

When will 5G start in Russia?

"The active deployment of 5G networks at domestic base stations will begin in 2026 in large Russian cities," the minister said, noting that preparatory work to launch the networks will take place in 2025.
