
North Cyprus Power Station Generator

How many megawatts can a power plant generate in Cyprus?

The Cyprus Transmission System Operator reported maximum available generation from the Electricity Authority of Cyprus (EAC) units at 1,023 megawatts yesterday evening. However, an additional malfunction at the Dhekelia power station reduced system capacity by 60 megawatts, creating a precarious situation.

Why is Cyprus relying on electricity during night hours?

The Republic of Cyprus's electricity supply faces severe strain during evening hours as power plant failures and ongoing maintenance work continue to plague the national grid, forcing reliance on emergency supplies from the occupied north and renewable sources.

Will Turkish Cypriot Power a wind farm in the evening?

With evening consumption typically ranging between 940-960 megawatts, the grid may need to draw power again from the Turkish Cypriot network, hoping for additional wind farm generation during evening hours.
