
Outdoor 12V uninterruptible power supply

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What is outdoor UPS & how does it work?

Outdoor UPS is designed for extreme demanding environments where clean backup power is needed. Built-in with AVR function, it helps to maintain normal operation without transferring to battery mode during ... charging current. The battery backup system provides constant and reliable backup power to outdoor equipment.
