This container generator set is waterproof and dustproof. Surface of this generator set is painted according to special paint coating and process requirements.

What is an outdoor generator enclosure?

In commercial settings, outdoor generator enclosures are typically made of heavy-duty materials and designed specifically for the generator's needs, with appropriate ventilation and access points. They support optimal operation, such as cool temperatures and maintenance demands, while offering protection from the weather, theft and vandalism.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system? Put simply, yes.
