# Pakistan solar Water Pump

What is a solar water pump?

A solar Water pump is a normal pump with an electric motor. To generate the electricity needed for the engine on site, a photo voltaic panel converts the sun's energy into a continuous electric current (12 or 24V in general) that can be stored in a solar battery park.

How to promote solar powered water pumping systems in India?

Therefore, to promote solar powered water pumping systems across India, our Indian government has launched the PM-KUSUM (Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan) scheme. Under this scheme, central government is providing up to 90% subsidy on solar water pumps through MNRE department.

Do solar water pumps need a DC motor?

Since photo voltaic panels generate a continuous electric current, a solar water pump equipped with a DC motor must be used. Small-scale pumping irrigation is one of the most interesting uses of solar energy since the maximum intensity of solar radiation is generally the period of the most important pumping water requirements.

Flexible: Solar water pumps can be installed in a variety of locations and are suitable for a range of applications, including irrigation, ...

Solar water pump definition A solar water pump is a mechanical pump powered by electricity generated using photovoltaic panels. It is popularly referred to as a solar water ...
