## Paris installs solar panels

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Why is solar PV mandatory in France?

Mandatory solar: Solar PV is mandatory for living roofs for commercial and industrial buildings or covered car parks occupying 500 m<sup>2</sup> or more of ground surface. Power to the people: France's current policy framework is supportive of collective self-consumption and energy communities, with flexible regulations supporting prosumers.

Does France have a solar PV market?

Historically, the residential solar PV market in France lagged behind neighbouring countries, due to low electricity prices and limited incentives. We estimate that no more than 6% of the addressable market has been tapped - Germany in comparison has reached 24% of market penetration. But momentum is building.

Is France a good country for rooftop solar?

France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. France's photovoltaic (PV) policies are developed within the National Low Carbon Strategy and the Energy Programme Decree.

Complete 2025 ranking of top solar companies in France featuring Grace Solar at #3. Detailed analysis of market leaders, technologies & regulations.
