
Port Louis Energy Storage Containers Expandable Trading Conditions

Does Port-Louis need to improve its container handling performance?

Port-Louis faces more serious regional competitors than used to be the case - Toamasina in Madagascar was barely regarded as a peer for Port-Louis ten years ago, but with significant Japanese investment has in many ways surpassed it. 6.49. This all suggests that performance in container handling needs to improve significantly. 6.50.

How will poor productivity affect Port-Louis' position as a container hub?

Poor productivity in container handling increases costs of trade and - just as damaging in the long term - may imperil Port-Louis' position as a potential container hub, without which it will not achieve economies of scale and, as a 'secondary' destination, will face longer, slower and more expensive trade routes with its trading partners. 1.10.

How efficient is Port-Louis?

A. The World Bank assessed Port-Louis to have an average technical efficiency score of around 30%, with ports such as Mombasa and Djibouti among the most technically efficient ports (Figure 29 above) 136.

Which bunker fuel is available in Port Louis?

Three grades of bunker fuel, namely GO 2500, FO 180, and FO 380, are currently available in Port Louis. The MPA has allocated land in the port area to private developers for the construction of additional storage facilities, which will increase the storage capacity from its current level of 145,000 metric tons to over 200,000 metric tons.
